

What Happens after the Ambulance door closes?

Mike Dillon, MA, ATC, CSCS, EMT-I (R)
Piedmont Athens Regional

- Have a good emergency plan and communicate before the event
- Have a crisis management plan
- Assign an individual within your organization to be a case manager for the injury and free up their time to do what is necessary
- Check your insurance or insurances! Do they cover everything the athlete will need for the next 50 years – such as round the clock nurses, van, home remodels, power and manual wheelchairs, ventilators, travel expenses for family, lost wages for family, housing for family and many many many other issues you can't even to begin to imagine
